DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 18-21, drawn to a foundation pile apparatus, classified in class 52, subclass 721.3.
- II. Claim 10-14 and 15-17, drawn to a method of installing foundation piles, classified in class 405, subclass 232.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the foundation pile apparatus (i.e., product) can be used in a materially different process of using the foundation pile apparatus (i.e., product), such as a process of placing the pile on the surface of the ground (as for example, upon an already existing pile or compacted earth).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3673

A telephone call was made to Attorney Michael S. McCoy on 13 September 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
